

Data sheet Product EMB 135 150 SA

Cases>Heat dissipating case

Embedded case

contents of delivery: **1** = 1 x case profile; **2** = 2 x cover panel; **3** = 1 x bottom panel; **4** = mounting material

- universal cooling fin case made of aluminium extruded profile, cover panels in 2 mm thickness and removable bottom panel
- optimized heat dissipation by means of external cooling fins
- the integrated T-grooves in the case profile for mounting of i.e. mainboards in the **Mini-ITX** or **NUC** form factor by means of distance, bolts and mounting plate also **EBX**, **Nano ITX**, **EPIC**, **ETX/XTX** and **PC/104** form factors by means
- internal guide grooves for inserting PCBs or mounting plates
- wall-, ceiling- or top-hat rail mounting by means of fixing straps or top-hat rail mounting from the bottom
- special designs, embedded cover panels, machinings, surfaces and printings upon request

* accessories mounting set BFS

Features

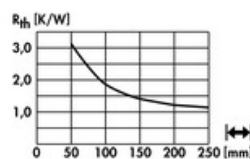

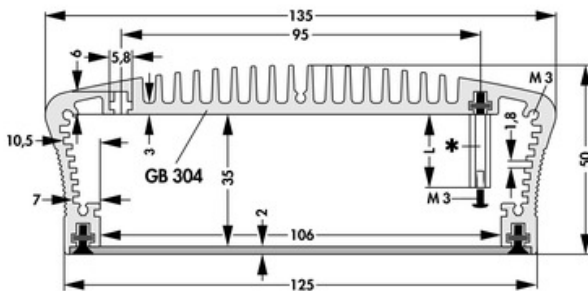

surface:

black anodised

way of fixation (optional):

- fixing of mounting rail
- mounting strap set

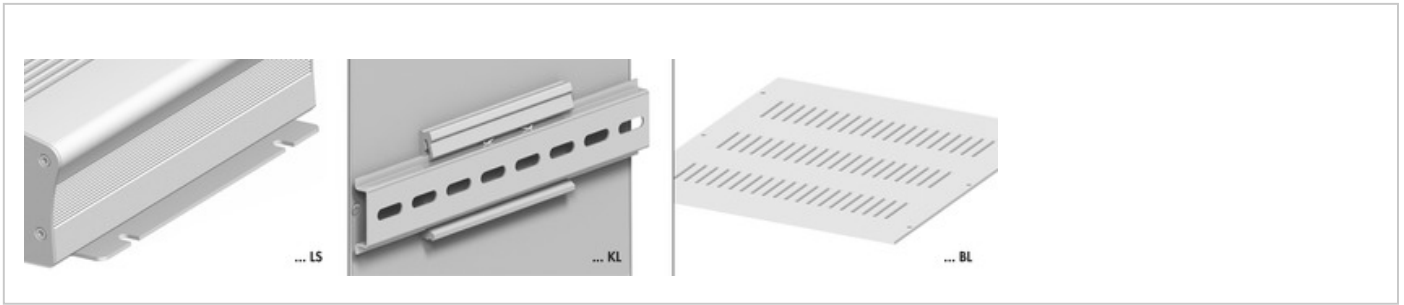

Technical Drawing

length:

150 mm
