

Is Now Part of

ON Semiconductor®

To learn more about ON Semiconductor, please visit our website at <u>www.onsemi.com</u>

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (_), the underscore (_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild_questions@onsemi.com.

ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or unavteries, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out or i, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor and is officers, employees, uniotificated use, even if such claim any manner.

November 2013

FCP380N60 / FCPF380N60 N-Channel SuperFET[®] II MOSFET 600 V, 10.2 A, 380 mΩ

Features

- 650 V @ T_J = 150°C
- Typ. R_{DS(on)} = 330 mΩ
- Ultra Low Gate Charge (Typ. Q_a = 30 nC)
- Low Effective Output Capacitance (Typ. C_{oss(eff.)} = 95 pF)
- 100% Avalanche Tested
- RoHS Compliant

Applications

- LCD / LED / PDP TV Lighting
- Solar Inverter
- AC-DC Power Supply

Description

SuperFET[®] II MOSFET is Fairchild Semiconductor's brand-new high voltage super-junction (SJ) MOSFET family that is utilizing charge balance technology for outstanding low on-resistance and lower gate charge performance. This technology is tailored to minimize conduction loss, provide superior switching performance, dv/dt rate and higher avalanche energy. Consequently, SuperFET II MOSFET is very suitable for the switching power applications such as PFC, server/telecom power, FPD TV power, ATX power and industrial power applications.

Absolute Maximum Ratings T_C = 25°C unless otherwise noted.

Symbol	Parameter			FCP380N60	FCPF380N60	Unit	
V _{DSS}	Drain to Source Voltage		600		V		
V _{GSS}	Gate to Source Voltage	- DC		±			
		- AC	(f > 1 Hz)	±	30	V	
I _D	Drain Current	- Continuous ($T_C = 25^{\circ}C$)		10.2	10.2*	А	
		- Continuous (T _C = 100 ^o C)		6.4	6.4*		
I _{DM}	Drain Current	- Pulsed	(Note 1)	30.6	30.6*	А	
E _{AS}	Single Pulsed Avalanche Energy			211.6		mJ	
I _{AR}	Avalanche Current		(Note 1)	2.3		А	
E _{AR}	Repetitive Avalanche Energy		(Note 1)	1.06		mJ	
dv/dt	MOSFET dv/dt			1	V/ns		
	Peak Diode Recovery dv/dt		(Note 3)	20			
P _D	Dower Discipation	(T _C = 25°C)		106	31	W	
	Power Dissipation	- Derate Above 25°C		0.85	0.25	W/ºC	
T _J , T _{STG}	Operating and Storage Temperature Range			-55 to	°C		
ΤL	Maximum Lead Temperature for Soldering, 1/8" from Case for 5 Seconds			3	°C		
Drain curren	limited by maximum junction ten	nperature.	ų
