## **EL-USB-1-PRO**

The EL-USB-1-PRO data logger measures and stores up to 32,510 temperature readings over the -40 to +125°C (-40 to +257°F) measurement ranges. The logger is housed in an stainless steel case, to protect the logger from corrosion, impact and moisture. A long life lithium battery is included, which allows logging for up to 3 years.

The user can easily set up the logger and view downloaded data by plugging the device into a PC's USB port and using the supplied software. Data can then be graphed, printed and exported to other applications.

#### **FEATURES**

- -40 to  $+125^{\circ}$ C (-40 to  $+257^{\circ}$ F) measurement range. •
- Stainless Steel (316). •
- Environmental protection to IP67. .
- USB interface for set-up and data download.
- User-programmable alarm thresholds. ٠

#### **BATTERY REPLACEMENT**

We recommend that you replace the battery every 18 months, or prior to logging critical data.

The EL-USB-1-PRO does not lose its stored readings when the battery is discharged or when the battery is replaced; the data logging process will however be stopped and cannot be re-started until the battery has been replaced and the logged data has been downloaded to PC.

Only use an EL-USB-1-PRO battery back supplied by Lascar, which is rated for use in high temperatures and has the correct battery terminals. Using non-Lascar batteries may result in fire or explosion at high temperatures.

Note: Leaving the EL-USB-1-PRO plugged into the USB port for longer than necessary will cause some of the battery capacity to be lost.
