

### 81505435-Positive output

#### Symbol

|                                                                                                       |             |
|-------------------------------------------------------------------------------------------------------|-------------|
| Operating pressure (bar)                                                                              | 2 → 8       |
| Sensor consumption for relay supply at 6 bars                                                         | 5           |
| The distance between relay and sensor must be less than 15 m for a tube $\varnothing 2.7 \times 4$ mm | ✓           |
| Connection                                                                                            | ✓           |
| Operating temperature (°C)                                                                            | -5 + 50     |
| Mechanical life (operations)                                                                          | $\geq 10^7$ |
| Weight (g)                                                                                            | 35          |
