Accessories			Undervoltage releases
Standard/Approval			UL/CSA, IEC
Construction size			NZM1
Description			Non-delayed disconnection of NZM circuit-breaker or N switch-disconnector when the control voltage sinks below 35 – 70% Us. For use with emergency switching off devices in conjunction with Emergency switching off button. When the undervoltage release is de-energized, accidental contact with the main contacts of the switch during attempts to switch on is safely prevented. Undervoltage releases cannot be installed simultaneously with NZMXHIV early-make auxiliary contact or NZMXA shunt release.
Connection type			with terminal block on the left-hand switch side
Auxiliary contacts			without auxiliary contact
Rated control voltage	Us	V	208 - 240 V 50/60 Hz
For use with			NZM1(-4), N(S)1(-4)
